“The Box”

We used our GPS tracking device to find the “Box” at the south end of campus. The coordinates of 40.34607 and -74.64403 lead us past the football stadium and Jadwin Gym. We kept on walking along the south end parking lot until we reached a drainage pond. The box was the same one as in the picture that we received in class and our GPS tracking device was about 10 meters off then the coordinates on the sheet. It was very helpful in pointing us in the right direction to start off and was fairly accurate. The box was located on the drainage pond in some grass. You could not see it directly from the street because it was hidden behind some Pine trees. The box was locked so I couldn’t see what was inside of it, but probably some kind of electrical appliances. Overall, our GPS tracking device helped us greatly in finding the box and lead us in the right direction from the start. It was a good lab to get aquatinted with the receivers and learn how they work.
